Two-hundred seventy one (271) other companies were represented by proxy.

The meeting convened as scheduled, Mr. Donlan of Allstate Insurance Company, Chair of the Governing Committee, presiding.

Attention was directed to the Rate Bureau’s Antitrust, Conflict of Interest, Code of Ethics and Standards of Conduct Statements.

Ms. Biliouris announced that there was a quorum.

1. Annual Report
   Mr. Evans reviewed and commented on the 2018 Annual Report, a copy of which is attached hereto.

2. Governing Committee Election
   Mr. Lyon, Chair of the Nominating Committee, reported that the Nominating Committee (comprised of National General Insurance Corporation, American Home Assurance Company, State Farm Mutual Automobile Insurance Company and Nationwide Mutual Insurance Company) recommended the following companies to continue to serve a second three-year term on the Governing Committee: National General Insurance Corporation for the stock position and Liberty Mutual Insurance Company for the non-stock position. He further reported
that the Nominating Committee recommends the following as new companies to
be elected to serve on the Governing Committee: Builders Mutual Insurance
Company for the non-stock position and Progressive Casualty Insurance
Company for the stock position. The floor was opened for additional nominations
and there were none.

Following motions to close the nominations and to elect the recommended slate,
the companies recommended by the Nominating Committee were elected to three-
year terms on the Governing Committee. Mr. Evans thanked United Services
Automobile Associate and Unitrin Auto and Home Insurance Company for their
service on the Governing Committee.

3. Comments from the Chairman
Mr. Donlan thanked members of the Governing Committee for their service to the
industry as well as counsel and staff for their work throughout the year.

4. Adjournment
There was no further business and the meeting was adjourned.

Respectfully Submitted,

Joanna Biliouris
Chief Operating Officer

1 2018 Annual Report
GENERAL MANAGER’S REPORT

2018 has been a very busy and successful year for the Rate Bureau. It comes as no surprise that we spend a good deal of time formulating goals and objectives and charting a course to accomplish the same. I don’t recall many surprises over the past year, but I will say that the biggest surprise was the complexity surrounding what we did accomplish. For instance, last year the Bureau experienced a significant number of retirements. As a result, we filled three senior positions including our new Director of WC Operations, Jarred Chappell; Information Center Supervisor, Latimia Roberson-Hill; and Regulatory Manager, Natasha Sumter, replacing Betty Hurst who is retiring in 2019. We miss those that have left, but are confident that our new hires will bring exceptional talents and experience to our operations. Effective operations begin with our staff, and Joanna has done very well in filling staffing vacancies.

Adequate rates are a goal each year, and we have had some notable successes in filings: a mid-single digit increase for homeowners; a mid-single digit increase for dwelling, and significant decreases for workers compensation. Other filings in process this year include a new flood insurance program and significant revisions to the current mobile home programs.

One of our continuing focuses is customer service, with workers compensation insurance for 35,000 or so assigned risk employers being a prime example. We are working towards a real-time environment for most WC transactions, posturing our operations for further advancements in the next year or so.

Effective communication is always on our list of objectives each year. By my count, the Bureau has hosted close to 100 committee meetings of one kind or another during the past year. These meetings have covered important materials and information, making participation and communication vital to our success. We are exploring innovative measures to encourage ongoing member participation and to ensure that future meetings are effective, informative, and productive.

A notable milestone for the Bureau in 2018 was the engagement of two interns from East Carolina University. Natalie Linares, Manager, Training and Development; Davis; Information Services, led by Shelley Chandler; and Human Resources and Facilities, led by Vicki Godbold.

I also want to recognize our Organization’s “shared services” that operate independently from the insurance operations but are critical to the success of fulfilling our duties and obligations. These are Accounting and Finance, led by Edith Davis; Information Services, led by Shelley Chandler; and Human Resources and Facilities, led by Vicki Godbold.

My report this year is largely centered on our associates, which is appropriate and why the Rate Bureau has again enjoyed a successful year. There is another individual I would like to recognize. He is Mickey Spivey, a partner at Young Moore and Henderson, our legal counsel who is with us at almost every meeting, involved in almost every filing, and the list goes on. He has been a great help in developing a good working relationship with the NCDII.

2018 has been a good, productive year, and part of the success is due to the support, help, counsel, and enthusiasm of the Governing Committee chaired by Jennifer Jabben. It is also important to recognize our numerous other committees, including the new Property Flood Subcommittee and the Property Rating Committee, which have both been particularly busy this year. Thanks to all of you who have generously contributed your time participating in committee meetings this year.

A special thanks to all who participated in committees, subcommittees, and task force groups for the North Carolina Rate Bureau in 2018.

*Chair
In my first year at the Rate Bureau, I have been impressed with the expertise and participation rate of our member companies. The Rate Bureau has eight active committees that are focused on auto and property rates, forms, and rules, with 75 members extending across these committees. I greatly appreciate the commitment our team members make in order to benefit the state of North Carolina.

As stated last year, I am interested in improving our committee meetings by making them more interactive and collaborative so that we can make better industry-wide decisions.

By all measures, 2018 was another successful year for the North Carolina Rate Bureau. These achievements are a result of the efforts put forth by our talented and dedicated Bureau associates, committee members, counsel, and consultants.

PERSONAL LINES

In my first year at the Rate Bureau, I have been impressed with the expertise and participation rate of our member companies. The Rate Bureau has eight active committees that are focused on auto and property rates, forms, and rules, with 75 members extending across these committees. I greatly appreciate the commitment our team members make in order to benefit the state of North Carolina.

As stated last year, I am interested in improving our committee meetings by making them more interactive and collaborative so that we can make better industry-wide decisions.

Automobile

The Rate Bureau is required to make a filing on Private Passenger Auto insurance each year by February 1. Due to the consent order issued in June 2017 by the Commissioner of Insurance (Commissioner) requiring an informational only review in 2018, the Rate Bureau did not request a rate level change on February 1, 2018. The Rate Bureau will perform a review and if indicated, may file a full rate level change for February 1, 2019.
In May of this year, the Commissioner approved revisions to the Amendatory Endorsements NC 00 13 and NC 00 12 which are mandatory endorsements required to be attached to the Personal Auto Policy. These revised endorsements amend Part E — Duties After An Accident Or Loss — Filing A Claim and Part F — General Provisions of the policy. The purpose of these revisions is to protect insureds and insurers better regarding assignment of benefits practices in North Carolina.

**Property**

On November 17, 2017, the Rate Bureau filed with the Commissioner a proposed average rate level change of 18.7% for the Homeowners program. The proposed filing included rate changes varying by form and territory, revised windstorm or hail exclusion credits, revised wind mitigation credits, and revisions to the base amount of insurance and base deductibles. The Rate Bureau and Commissioner negotiated a settlement agreement dated April 18, 2018, which resulted in an approved statewide average rate level increase of 4.8% for all Homeowner forms effective October 1, 2018.

In April 2018, the Rate Bureau filed and received approval from the Commissioner to add Assignment of Benefits language within our Dwelling and Mobile Home programs, which goes into effect on October 1, 2018.

The Rate Bureau also filed and received approval from the Commissioner for new Homeowner endorsements for Home Sharing and Drones and amending a provision in the policy for Assignment of Benefits to be effective January 1, 2019.

On February 7, 2018, the Rate Bureau filed with the Commissioner a proposed average rate level change of 18.9% (Fire -20.8% and Extended Coverage 40.5%) for the Dwelling Policy program. That filing also updated the territories so that they are now consistent with our Homeowner territory definitions. The Rate Bureau and Commissioner negotiated a settlement agreement dated June 27, 2018, which resulted in an approved statewide average rate level change of 4.8% for all Dwelling forms effective February 1, 2019.

The Rate Bureau continues to work on a Flood program, with NC being the eighth largest state for National Flood Insurance Program (NFIP) policies. The Property Flood Subcommittee has evaluated a feasibility study, which shows nearly 50% of the policies in the Special Flood Hazard Areas could be written privately at or lower than the current NFIP rate. For those areas outside the Special Flood Hazard Area (almost 2 million homes), about 90% of those could be written lower than the NFIP rate level. The next steps include a review of the policy forms and rating structure and evaluation of Flood catastrophe models.

The Mobile Home rate review is in full swing. This year we anticipate completing a full rate review and updating deductibles, AOI curves, and other rating variables.

**Safe Driver Insurance Plan**

As required in the General Statutes, the Bureau continues to provide a mechanism for policyholders to appeal “points” that have been charged as a result of at-fault accidents. The Bureau receives an average of 50 disputes per year, of which most are resolved without a hearing. Below is a summary of the outcomes of the disputes that required a hearing.

**Legislation**

HB 382 was enacted in June 2018 and includes the following pertinent provisions:

- Legislation revised consent to rate (CTR) procedures for private passenger auto and residential property insurance, effective January 1, 2019, to remove the requirement that the insurer obtain the written consent of the insured prior to using CTR. Therefore, for policies issued, renewed, or amended on or after January 1, 2019, use of the current CTR form and obtaining the policyholder’s signature authorizing CTR will no longer be required. Insurers will be required to give a specified notice to the insured on the first page of the declarations or on a separate page before the declarations page that the rates used to calculate the premium are greater than the rates that are applicable in North Carolina. Please see the revised statute for the specific requirements for that notice.
- The Department shall collect annually from member companies the percentage of policies that are CTR and the average difference between the approved premium and the consented premium by territory. (GS 58-36-30)
- With certain exceptions, companies must obtain records of convictions for moving traffic violations prior to the sale of a new policy. (GS 58-36-65)
- Commercial Auto Rate Evasion — Legislation added two more criteria to establish documentary “reliable proof” of North Carolina residency and/or eligible risk status for cession of a policy to the Reinsurance Facility. (GS 58-2-164)
Workers Compensation Regulatory Activity

2018 was a short session for the North Carolina General Assembly. During the short session, new legislation is typically not considered, as the primary focus during this session is on the budget and legislation that passed the house of origin during the long session. Although there is little to report on pending legislation, a number of items of interest continue to be monitored by the Bureau.

North Carolina Workers Compensation Opioid Task Force—This task force was established in February 2017 by the North Carolina Industrial Commission (NCIC) at the direction of the North Carolina General Assembly and was charged with studying and recommending solutions for problems arising from opioid abuse. The task force researched and developed rules that became effective May 1, 2018. The new rules are a proactive measure aimed at reducing opioid misuse and addiction in workers compensation claims, while facilitating the timely and effective delivery of appropriate medical treatment for pain management.

House Bill 243, signed into law on June 29, 2017, is known and cited as the Strengthen Opioid Misuse Prevention Act of 2017 or the STOP Act. It is intended to reduce the supply of unused and misused opioids being circulated in North Carolina. The highlights of this bill include (1), a limit on the number of days opioids can be prescribed and (2), a requirement that prescribers report prescriptions through the NC Controlled Substances Reporting System.

This legislation and the efforts of the Opioid Task Force demonstrate North Carolina’s willingness to take steps toward minimizing the opportunities for the abuse and addiction of opioids in our state.

Ambulatory Surgical Center Fee Schedule Update—As stated in last year’s annual report, the North Carolina Industrial Commission (NCIC) sets the workers compensation fee schedule for Ambulatory Surgical Centers (ASC) through the rulemaking process. Prior to April 1, 2015, the rate of reimbursement for ASCs was 67.15% of billed charges. A new fee schedule was established to set the maximum reimbursement rate for ASCs at 220% of the Medicare rate effective April 1, 2015, and further reduced the maximum reimbursement for ASCs to 210% on January 1, 2016, and 200% on January 1, 2017.

In October 2015, Surgical Care Affiliates (SCAI) challenged the NCIC April 1, 2015, fee schedule. This challenge was denied by the NCIC and then was granted by the Wake County Superior Court. On appeal, the North Carolina Court of Appeals in November 2017 reversed the Superior Court and held that the medical fee schedule promulgated by the NCIC is valid retroactively to April 1, 2015. The North Carolina Supreme Court denied a petition for discretionary review, and therefore the fee schedule set by the NCIC continues to be the effective fee schedule for ambulatory surgical centers.

Additional information on legislative activity and other items of interest related to workers compensation can be found in the 2018 Report on Workers Compensation Insurance in North Carolina located in the “Recent News” section of the Bureau’s website at www.ncrb.org.

Disputes

Each year the Bureau reviews a number of disputes submitted by carriers and insureds related to workers compensation manual rules, the experience rating plan, and the administration of the Workers Compensation Insurance Plan. This past year, 120 disputes were received and resolved, with one dispute requiring a formal hearing. The top three reasons for disputes during the past 12 months were class codes (24%), cancellations (22%), and residual market eligibility (12%).

Workers Compensation Operations

The Workers Compensation Operations department has responsibilities pertaining to the maintenance and equity of a thriving workers compensation market in the State of North Carolina. Within the department, we are divided into three operational areas:

• Assigned Risk and Underwriting Operations
• Data Services
• Information Center

Since our last report, the Workers Compensation Operations department has embarked on several new projects to streamline processes and increase efficiencies.

• E-Payments — A new payment method is being implemented to facilitate direct funds transfer from the assigned risk agent to the carrier.
• Spectrum Upgrade—Our internal data management system was upgraded to provide for future “real-time” data transfer with our carrier partners.
• ManageOwnership Enhancements—Our ManageOwnership system was enhanced to allow more interaction with agents and facilitate an efficient flow of information regarding ownership changes.
• ManageAR Enhancements—The primary system will undergo major enhancements to make the platform more intuitive and ensure accurate applicant information.
• Carrier Improvements to Fine Data and Reports — Our Data Services team implemented a new look and feel to our fine reports.
• Data Quality Improvement Program — The Data Services team is educating carriers on data timeliness and quality
• Service Management Software Enhancement—Improvements to our customer service point of contact software will allow our Information Center to provide more accurate and timely response to inquiries.

Assigned Risk and Underwriting Operations

As the administrator for the North Carolina Workers Compensation Insurance Plan, the Bureau administers the statewide residual market. The Assigned Risk and Underwriting Operations team is tasked with the analysis and assignment process on approximately 17,000 applications annually. The Bureau works with three servicing carriers and eight direct writing carriers to place applicants in the residual market. Our servicing carriers are now in the second year of a three-year contract.
The Assigned Risk and Underwriting Operations team is also responsible for issuing rulings on ownership and class code questions for the workers compensation market in North Carolina, both residual and voluntary markets. Our team reviews each of these work items to make sure that data is reported accurately for experience modification calculation and rate development. Overall, this team handles an average of 9,793 work items each month.

July 2017 – June 2018 Statistics
New Applications 17,644
Applications Submitted Electronically 98%
Average Premium Size $2,959
Work Items Completed Annually 117,525
Total Assigned Risk Premium $79,016,441

Data Services
The Data Services team members are our technical experts that oversee the daily collection and management of Policy Data and Unit Statistical Data. Throughout the 2017-2018 year, the team collected information on over 705,980 policy-related transactions and over 229,046 unit statistical data-related transactions. The Unit Statistical data reported generated 39,847 experience modifications to North Carolina employers.

Data Services is the primary point of contact to help our member carriers with any data reporting needs. In order to maintain the integrity of our data, this team works closely with our member companies to ensure ease and accuracy of reporting.

The Take-Out Credit program is an important aspect of our assigned risk plan that the Data Services team administers. In 2017, credits totaled $12.92 million among 92 carriers, representing an increase of over 150% in the last 5 years.

Training and Development
The Bureau continues to grow in the areas of training and development. Our primary training initiative this year focused on internal cross training to increase subject area knowledge within our department. This has given more stability to our production teams during seasonal staffing shortages and allowed greater flexibility to handle fluctuations in daily work volume. In addition, we offered on-site training for local agents, jump-starting an initiative to provide more training programs and educational opportunities for agents in 2019. The training department is a proponent of learning through technology, which is demonstrated by on-demand webcasts available on our website and expansion of these offerings in 2019. One of our most notable accomplishments was the implementation of our first ever Insurance Operations Summer Internship Program; two students were selected for a 10-week learning opportunity. Through training, observing and participating in organizational workplace experiences, the interns gained useful knowledge and professional skills associated with the following areas: Workers Compensation operations, Assigned Risk, Unit Statistical Data, and Personal Lines operations.

Website Redesign
NCRB will soon unveil our redesigned website. We are excited about the changes, as we think our users will find the site to be more modern, dynamic, and easier to navigate. We have minimized lengthy page scrolling and organized content more intuitively. The ultimate goal is to provide a platform that offers seamless access to the array of content, tools, and functionality that our users rely on us to deliver.
Information Services continues to leverage technology advances to enhance our business processes and to fulfill the needs of our customers. Through daily operations and project work, it is our duty not only to support the organization, but to introduce innovative strategies that guarantee robust systems and applications, and allow for expansion in areas where progress is desired.

A significant amount of effort is spent resolving daily issues that impact productivity and that keep essential processes moving forward. Extensive planning goes into resource allocation for IT staff; however, we remain flexible in our commitment to provide our customers with the highest level of efficiency.

Project work also contributes to our goal of promoting efficiency. From an infrastructure standpoint, we’ve implemented projects that continually improve our environment and our security posture. In 2018, some of the most significant upgrades we performed were to our storage network, increasing our Internet bandwidth, upgrading our server and desktop operating systems, and modernizing Enterprise Services to current releases and versions.

With reported data breaches around the country and world increasing approximately 45% from 2015 to 2016 and again from 2016 to 2017, we continue to have an increased focus on security. We work to protect our environment and prevent breaches by continuing to adhere to the belief that the best defense against security risks is employee training. We provide monthly security training and routine phishing simulations to teach employees how to defend against common and emerging threats and how to protect the data they are entrusted with to execute their jobs. We also continue to harden and isolate our systems by upgrading perimeter security and limiting system permissions to only those users that require access to perform their job duties.

In order to predict and prevent security breaches, we continued to work with professional security experts to conduct regular risk assessments that alert us to any risks [or threats] in advance so that we can remediate promptly and appropriately. In addition to network testing, we also conducted penetration testing for some of our custom web applications to provide further insight into our security posture.

While we have never experienced a major business interruption, it is important that we are prepared to detect and respond to potential events. In early 2018, we changed our Cyber Security Insurance Policy to include significant response resources in the event of a breach. Our outside security consultant also conducted a Cyber Readiness Review to provide strategic guidance on effectively detecting, containing, eradicating, and remediating suspected incidents and their impact on our business. This provides reassurance to our customers that we are aware and prepared to facilitate business recovery should an incident occur.

We look forward to expanding our capabilities for enhancing our customer experience through technology while ensuring security of the data we protect.

“Unleash the potential that is in another and you unleash the potential that is in you.”
— Matshona Dhliwayo

Our Human Resources is the strategic and comprehensive approach committed to our Organization’s most valued assets—our people. Facility Services provide a secure and comfortable work environment along with mail services and receptionist services. In HR, beginning in 2016, we based our Performance Evaluations on individual associate job descriptions, which included a comprehensive review and update by associates in 2017. We also added five new associates and are in the process of recruiting one additional member of staff. We hired our first interns, with two working in Insurance Operations this year.

Our Wellness Program consists of
- a partnership with WakeMed Hospital,
- a partnership with the Performance Athletic Center (EXOS),
- a partnership with the NC Prevention Partners,
- annual participation in the Wellness Council of America’s (WELCOA) Step-By-Step program of walking 10k steps a day,
- flu shots provided for associates on-site, and
- certification in First Aid, CPR, and AED for a third of our workforce through the American Red Cross.

On-site training this year consisted of wellness seminars, and we conducted off-site training for new management staff. Community Service involvement by our associates this year included the United Way and the NC Food Bank.

Celebrating Service Milestones
- 1 associate celebrating 5 years
- 6 associates celebrating 10 years
- 4 associates celebrating 15 years
- 1 associate celebrating 25 years
The exhibits on page 10 summarize the Rate Bureau’s financial position and reflect the comparative balance sheets and income statements for the last two years ending August 31. A combination of improved claims experience and proceeds from reinsurance recoveries during the past year generated a modest increase in the restricted funds for our self-insured group medical insurance plan. Funds for retiree group insurance premiums of the Bureau’s predecessor organizations continue to remain on the balance sheet as of this report, though all those obligations have now been fulfilled as previously reported.

Johnson Lambert performed the annual audit for the year ending December 31, 2017, and presented its report to the Audit Committee in March 2018. The audit went very smoothly, and Johnson Lambert again issued an unqualified opinion on the statements of cash receipts and disbursements, noting there were no misstatements or internal control weaknesses identified during the audit, and that the significant accounting policies had been consistently applied during the current year.

The sources of income to the Bureau remain fairly consistent over the past few years, but income from fines and charges that were implemented in 2015 have dropped for the second consecutive year. Assessments to member companies represented 90% of the Rate Bureau’s receipts during the most recent report year as reflected in the chart that follows. The annual membership fees and various fines and charges were each approximately 5% of the Rate Bureau’s income, respectively. The Rate Bureau finished 2017 slightly over budget, and due to activity in several property programs initiated during 2018 detailed earlier in this report, the Governing Committee approved a $2 million amendment to the approved budget for 2018 to be included in the 4th quarter assessment. The total expenses of the Rate Bureau are comprised of the direct costs related to specific activities of the Bureau as well as the allocated expenses of the departments whose services are shared with the Reinsurance Facility and the Insurance Guaranty Association. Those direct expenses continue to represent just over 70% of the total expenses of the Bureau, and the table and chart on this page show a summary of the direct and allocated expenses for the previous two years and the first half of 2018. Onboarding of new staff, some for new positions and others to replace retirees, and the property programs previously mentioned were the largest drivers of the expense increases. As in the past, the 2016 final expenses will be adjusted by other income and miscellaneous items and reapportioned to all member companies also during the 4th quarter of 2018.

Initiatives for the current year include an increased focus on risk management, a review of our vendor relationships, and efforts to leverage more technology to increase our efficiency and our electronic interface with member companies. As part of our risk management initiatives, the Bureau, in conjunction with its sister organizations, put in place a significantly more robust cyber liability insurance program in early 2018.
