RETROSPECTIVE RATING PLAN PREMIUM ENDORSEMENT ONE-YEAR PLAN

This endorsement is added to Part Five (Premium) because you chose to have the cost of the insurance rated retrospectively. This endorsement explains the rating plan and how the retrospective rating plan premium will be determined.

This endorsement applies in the states listed in the Schedule. It determines the retrospective rating plan premium for the insurance provided during the rating plan period by this policy and any policy listed in the Schedule. The rating plan period is the one-year period beginning with the effective date of this endorsement.

The amount of retrospective rating plan premium depends on five standard elements and two elective elements.

A. RETROSPECTIVE RATING PLAN PREMIUM STANDARD ELEMENTS

The five standard elements are explained here.

1. Standard premium is the premium we would charge during the rating plan period if you had not chosen a retrospective rating plan. Standard premium does not include the following elements and any other elements excluded based on our manuals:
   - Premium discount
   - Expense constant
   - Premium resulting from the nonratable element codes
   - Premium developed by the occupational disease rates for employers subject to the Federal Mine Safety and Health Act
   - Premium developed by the catastrophe provisions

2. Basic premium is less than standard premium. It is standard premium multiplied by a percentage called the basic premium factor. The basic premium factor varies depending on the total amount of standard premium. The basic premium factor includes:
   - General administration costs of the carrier
   - Cost of loss control services
   - Net aggregate loss factor

The basic premium factor does not cover premium taxes or claims adjustment expenses. Those elements are usually provided for in the tax multiplier and the loss conversion factor.

The Schedule shows a range of basic premium factors for differing amounts of estimated standard premium. The actual basic premium factor will be determined after the standard premium is determined. If earned standard premium is not within the range of the estimated standard premiums shown in the Schedule, the basic premium will be recalculated.

3. Incurred losses are all amounts we pay or estimate we will pay for losses, interest on judgements, expenses to recover against third parties, and employers liability loss adjustment expenses. This includes paid and outstanding losses (including any reserves set on open claims). If the allocated loss adjustment expense (ALAE) option is elected, then incurred losses will include ALAE.

   Note: The rating formula for incurred losses will not include a loss for the following elements or any other elements excluded from our manuals, as applicable:
   - Resulting from the nonratable element codes
   - For the disease-related portion of losses covered under the Federal Mine Safety and Health Act
   - Resulting from the application of catastrophe provisions
   - Reported as fully fraudulent
   - Reported as noncompensable

4. Converted incurred losses are based on the incurred losses for a policy or policies to which the retrospective rating plan applies. A loss conversion factor is applied to incurred losses to produce the converted incurred losses. The loss conversion factor is shown in the Schedule.

5. Taxes are a part of the premium we collect. Taxes are determined as a percentage of basic premium, converted incurred losses, and any elective elements. The percentage is called the tax multiplier. It varies by state and by federal and nonfederal classifications. The tax multipliers are shown in the Schedule.

B. RETROSPECTIVE RATING PLAN PREMIUM ELECTIVE ELEMENTS

Two other elements are included in determining retrospective rating plan premium if you elected to include them.
They are the excess loss premium for the loss limitation and the retrospective development premium. They are explained here.

1. The election of a loss limitation means that the amount of incurred loss to be included in the retrospective rating plan premium is limited to an amount called the loss limitation. The loss limitation applies separately to each person who sustains bodily injury by disease and separately to all bodily injury arising out of any one accident.

   The charge for this loss limitation is called the excess loss premium. Excess loss premium is a percentage of standard premium multiplied by the loss conversion factor. The percentage is called the excess loss premium factor.

   Excess loss premium factors vary by state, by classification, and by the amount of the loss limitation. If you chose this elective element, the loss conversion factor, the loss limitation, the excess loss premium factors, and the states where they apply are shown in the Schedule.

2. The retrospective development element is used to help stabilize premium adjustments. The premium for this element is charged with the first three calculations of a retrospective rating plan premium and is called the retrospective development premium. It is a percentage of standard premium multiplied by the loss conversion factor. The percentage of standard premium is called the retrospective development factor.

   Retrospective development factors vary by state, by electing a loss limitation, and by first, second, and third calculations of retrospective rating plan premium. If you chose this elective element, the retrospective development factors are shown in the Schedule.

C. RETROSPECTIVE RATING PLAN PREMIUM FORMULA

   Insurance policies listed in the Schedule will be combined with this policy to calculate the retrospective rating plan premium. If the policies provide insurance for more than one insured, the retrospective rating plan premium will be determined for all insureds combined, not separately for each insured.

   1. Retrospective rating plan premium is the sum of basic premium, converted losses, plus the excess loss premium and retrospective development premium elective elements if you chose them. This sum is multiplied by the applicable tax multiplier shown in the Schedule.

   2. The retrospective rating plan premium will not be less than the minimum or more than the maximum retrospective rating plan premium. The minimum and maximum retrospective rating plan premiums are determined by applying the minimum and maximum retrospective rating plan premium factors, shown in the Schedule, to the standard premium.

   3. If this endorsement applies to more than one policy or state, the standard premium will be the sum of the standard premiums for each policy and state.

D. CALCULATION OF RETROSPECTIVE RATING PLAN PREMIUM

   1. We will calculate the retrospective rating plan premium using all loss information we have as of a date six months after the rating plan period ends and annually thereafter.

      We may make a special valuation of a retrospective rating plan premium as of any date that you are declared bankrupt or insolvent, make an assignment for the benefit of creditors, are involved in reorganization, receivership, or liquidation, or dispose of all your interest in work covered by the insurance. You will pay the amount due to us if the retrospective rating plan premium is more than the total standard premium as of the special valuation date.

   2. After any calculation of retrospective rating plan premium, you and we may agree that it is the final calculation.

   3. After each calculation of the retrospective rating plan premium, you will pay promptly the amount due us, or we will refund the amount due you. Each insured is responsible for the payment of all standard premium and retrospective rating plan premium calculated under this endorsement.

E. INSUREDS OPERATING IN MORE THAN ONE STATE

   If any of the policies provide insurance in a state not listed in the Table of States, and if you begin work in that state during the retrospective rating plan period, this endorsement will apply to that insurance if this retrospective rating plan applies in that state on an interstate basis. The retrospective rating plan premium standard elements, and the elective elements you chose, will be determined by our manuals for that state, and added to the Schedule by endorsement.

F. CANCELLATION OF A POLICY UNDER A RETROSPECTIVE RATING PLAN

   1. If the policy to which this endorsement is attached is cancelled, the effective date of the cancellation will become the end of the rating plan period of all insurance subject to this endorsement.

   2. If other policies listed in the Schedule of this endorsement are cancelled, the effective date of cancellation will become the end of the rating plan period for all insurance subject to this endorsement unless we agree with you, by endorsement, to continue the rating plan period.
3. If we cancel for nonpayment of premium, the maximum retrospective rating plan premium will be based on the standard premium for the rating plan period, increased pro rata to 365 days, and will include all of the applicable retrospective rating plan factors shown in the Schedule.

4. If you cancel, the standard premium for the rating plan period will be increased by our short rate table and procedure. This short rate premium will be the minimum retrospective rating plan premium and will be used to determine the basic premium.

   The short rate premium will be used to determine the excess loss premium and retrospective development premium if you chose these elective elements.

   The maximum retrospective rating plan premium will be based on the standard premium for the rating plan period, increased pro rata to 365 days.

5. Section F.4. will not apply if you cancel because:
   a. All work covered by the insurance completed
   b. All interest in the business covered by the insurance sold
   c. You retire from all business covered by the insurance

Schedule

1. Other policies subject to this Retrospective Rating Plan Premium Endorsement

2. Loss Limitation: $

3. Loss Conversion Factor

   Minimum Retrospective Rating Plan Premium Factor

   Maximum Retrospective Rating Plan Premium Factor

4. The basic premium factors shown here are based on estimates of standard premium. If the actual standard premium is within the range of estimated standard premiums shown here, the basic premium factor will be obtained by linear interpolation to the nearest one-tenth of 1%. If the actual standard premium is not within the range of estimated standard premiums, shown below, the basic premium factor will be recalculated.
